```

This is a Lactococcus lactis constitutional promoter sequence used in construction of an artificial promoter library of the invention. The

the

New artificial promoter libraries - sequences and variable spacers, used expression of genes.

es - containing consensus promoter used to generate promoters for optimising

WPI; 1998-179062/16.

New artificial promoter libraries - containing consensus promoter sequences and variable spacers, used to generate promoters for optimising expression of genes.

This is a Lactococcus lactis constitutional promoter sequence used in the construction of an artificial promoter library of the invention. The

```

This is a Lactococcus lactis constitutional promoter sequence used in the construction of an artificial promoter library of the invention. The

Claim 28; Page 54; 89pp; English

New artificial promoter libraries - containing consensus promoter sequences and variable spacers, used to generate promoters for optimising expression of genes.

WPI; 1998-179062/16.

```

This is a Lactococcus lactis constitutional promoter sequence used in the construction of an artificial promoter library of the invention. The

Claim 28; Page 55; 89pp; English.

New artificial promoter libraries - containing consensus promoter sequences and variable spacers, used to generate promoters for optimising expression of genes.

JOURNAL COMMENT ACCESSION VERSION KEYWORDS REFERENCE AUTHORS SOURCE ORGANISM DEFINITION TITLE Email: poustkammolgen.mpg.de
The library was characterised by oligonucleotide fingerprinting
(ONF) to reduce sequencing redundancy. According to the ONF
procedure, clones that display the same hybridisation matrix with a
battery of 200 8mer oligonucleotides are grouped into clusters. One
clone per ONF cluster is selected for sequencing. The size of each
cluster is an indicator of the frequency of a transcript in the
analysed library. The cluster size as well as the coordinates of
the other clones assigned to the same ONF cluster as the clone from
which the above EST is generated is available at the sea urchin
project web site at: http://www.molgen.mpg.de/ag_seaurchin/.cDNA
clones and filters are distributed via the Resource Center/Primary
Database of the German Human Genome Project (http://www.rzpd.de)

```

This is a Lactococcus lactis constitutional promoter sequence used in the construction of an artificial promoter library of the invention. The

New artificial promoter libraries - sequences and variable spacers, use expression of genes.

used

containing consensus promoter to generate promoters for optimising

```

This is a Lactococcus lactis constitutional promoter sequence used in the construction of an artificial promoter library of the invention. The

Claim 28; Page 55; 89pp; English

New artificial promoter libraries - containing consensus promoter sequences and variable spacers, used to generate promoters for optimising expression of genes.

No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         DB DB

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             constitutional promoter; optimise; spacer; library; gene expression; ds.
```

This is a Lactococcus lactis constitutional promoter sequence used in the construction of an artificial promoter library of the invention. The

Claim 28; Page 56; 89pp; English

New artificial promoter libraries - containing consensus promoter sequences and variable spacers, used to generate promoters for optimising expression of genes.

                                                                                                                                                                                                                                                                                                                                               Pred. No. is the number of results predicted by chance to have a
score greater than or equal to the score of the result being printed,
and is derived by analysis of the total score distribution.

No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.

```

New artificial promoter libraries - containing consensus promoter sequences and variable spacers, used to generate promoters for optimising expression of genes.

This is a Lactococcus lactis constitutional promoter sequence used in construction of an artificial promoter library of the invention. The

Claim 28; Page 57; 89pp; English.

New artificial promoter libraries - containing consensus promoter sequences and variable spacers, used to generate promoters for optimising expression of genes.

Claim 28; Page 58; 89pp; English

This is a Lactococcus lactis constitutional promoter sequence used in the construction of an artificial promoter library of the invention. The

Human

New artificial promoter libraries sequences and variable spacers, used expression of genes

used

containing consensus promoter to generate promoters for optimising

WPI; 1998-179062/16.

Jensen PR,

Hammer K;

Claim 28; Page 59; 89pp; English.

This is a Lactococcus lactis constitutional promoter sequence used in construction of an artificial promoter library of the invention. The

Jensen PR, Hammer K;

WPI; 1998-179062/16.

New artificial promoter libraries - containing consensus promoter sequences and variable spacers, used to generate promoters for optimising expression of genes.

Claim 28; Page 60; 89pp; English.

This is a Lactococcus lactis constitutional promoter sequence used in construction of an artificial promoter library of the invention. The in the

This is a Saccharomyces cerevisiae promoter sequence used in the construction of an artificial promoter library of the invention.

The

New artificial promoter libraries - sequences and variable spacers, used expression of genes.

used

containing consensus promoter to generate promoters for optimising

WPI; 1998-179062/16.
